

S 200

RESCH **63** THE MACHINE COMPANY SINCE 1955

AUTOMATIC SHARPENER

S 200

With the aid of the automatic sharpening and equalizing unit, you can sharpen blunt saw blades on site – Sharpening and equalizing are performed in just one single operation. Thanks to its dismantable construction, the unit is easy to transport.

- Manual clamping device for bandsaw blades.
- Manual infeed for tooth face and tooth spine.
- Automatic cycle counter
- Detaching device for grinding disk.
- Cleaning tongs on the entry side.
- Low vibrations, grinding disk is directly driven.
- Extra precise: The tooth tip, which is pushed, is grinded.
- Robust and compact design, dismantable for car transport.
- Optional: Equalizing device for swaged saw blades, sharpening and equalizing in just one single operation. Swaging device
