

S 200

RESCH 63 THE MACHINE COMPANY SINCE 1955

AUTOMATIC SHARPENER

S 200

Sharpen bandsaw blades directly on-site – quickly, precisely, and flexibly. The simple operation saves time. Thanks to its dismountable construction, the machine is easy to transport – ideal for mobile use.

Equipment features:

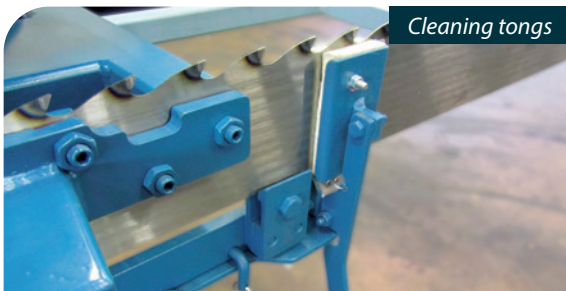

- Precise clamping device.
- Simple adjustment for tooth face and tooth back.
- Automatic cycle counter for efficient operation.
- Integrated dressing device for the grinding wheel.
- Cleaning pliers for an accurate grind.
- Directly driven grinding wheel for low vibrations.
- Extra precision: The pushed tooth tip is ground.
- Robust, compact design - easy to disassemble for transport.
- Optional: Equalizing device for swaged bandsaw blades - sharpening and equalizing in a single operation
